Testimonials

About Improve Veterinary Education

Improve Veterinary Education is the world leader in veterinary postgraduate training and education. Over the past 28 years, we've been at the forefront of veterinary CPD and are proud to have helped over 40,000 veterinary professionals reach their full potential.

Improve Veterinary Education Australia was established in 2014 and in 2019 partnered with Animal Emergency Australia, as the education arm. We are passionate about delivering quality education to the veterinary community in Australia, New Zealand and beyond. Our structured and progressive training gives professionals the opportunity to develop their skills and knowledge under the guidance of discipline experts. We work closely with our global Improve Veterinary Education partners on course innovation, global program delivery and new program offerings to meet the needs of busy veterinary teams.

Accredited Postgraduate Training

Our online programs are accredited globally by the International School of Veterinary Postgraduate Studies (ISVPS) in Europe, meaning you can work towards a postgraduate qualification that's recognised worldwide! Our structured modular programs can also help to prepare you for Membership of the Australian and New Zealand College of Veterinary Scientists (ANZCVS) examinations* in a range of subjects.

All courses are accredited with the New Zealand Veterinary Association (NZVA) and our online programs are also accredited with RACE for Continued Education (CE) hours.

*Improve Veterinary Education Australia is not affiliated with the Australian and New Zealand College of Veterinary Scientists nor do we intend to suggest or imply this program is endorsed by the ANZCVS.

ISVPS

About the ISVPS

ISVPS was established in 2003 with the purposing of empowering veterinary professionals to grow and excel in their careers, through internationally recognised qualifications, built for real world practice.

Why Choose an ISVPS Qualification?

- The ISVPS has over 20 years' experience in the provision of veterinary postgraduate assessments, qualifications and veterinary course accreditation.
- Assessment and examination methods are continually reviewed to achieve the highest standards and remain clinically relevant.
- Examinations & assessments done remotely - no travel required!
- ISVPS is an independent examining and awarding body - registration and examination fees for postgraduate certifications apply.

*ISVPS Fees are not included in Improve Australia's Program fees & are paid direclty to ISVPS

Join over **9,000 veterinary professionals** who have achieved a postgraduate qualification through the ISVPS.

LEARN MORE

ISVPS Qualifications

Veterinarians

The ISVPS offers a range of postgraduate certificates for veterinary surgeons at all stages of their career.

General Practitioner Certificate (GPCert)

The GPCert is suitable for qualified veterinary surgeons looking to further their knowledge and expertise in a specific discipline, enabling them to manage more complicated cases within their practice and share expertise with colleagues.

Advanced Postgraduate Programs (GPAdvgCert)

The next level of training for veterinary surgeons wanting to develop their knowledge in a specific clinical topic. Vets can achieve a GPAdvCert, awarded by ISVPS. Training for the advanced certificates is with our Improve Veterinary Education UK partners & in-person, with sessions in the UK Swindon or Sheffield Training Centres.

Nurses & Techs

The ISVPS offers two tiered certificates for veterinary nurses and technicians.

Nurse or Vet Tech Certificate (NCert/VTCert)

These qualifications are for nurses and techs who want to further their knowledge in a specific discipline and advance their career with additional training.

Advanced Nurse or Vet Tech Certificate (NAdvCert/VTAdvCert)

This is a more advanced qualification than the NCert/VTCert and is the 'next-step', with additional academic and peer recognition.

For all enquiries about ISVPS qualifications, please contact the ISVPS or visit their website.

About Our Programs

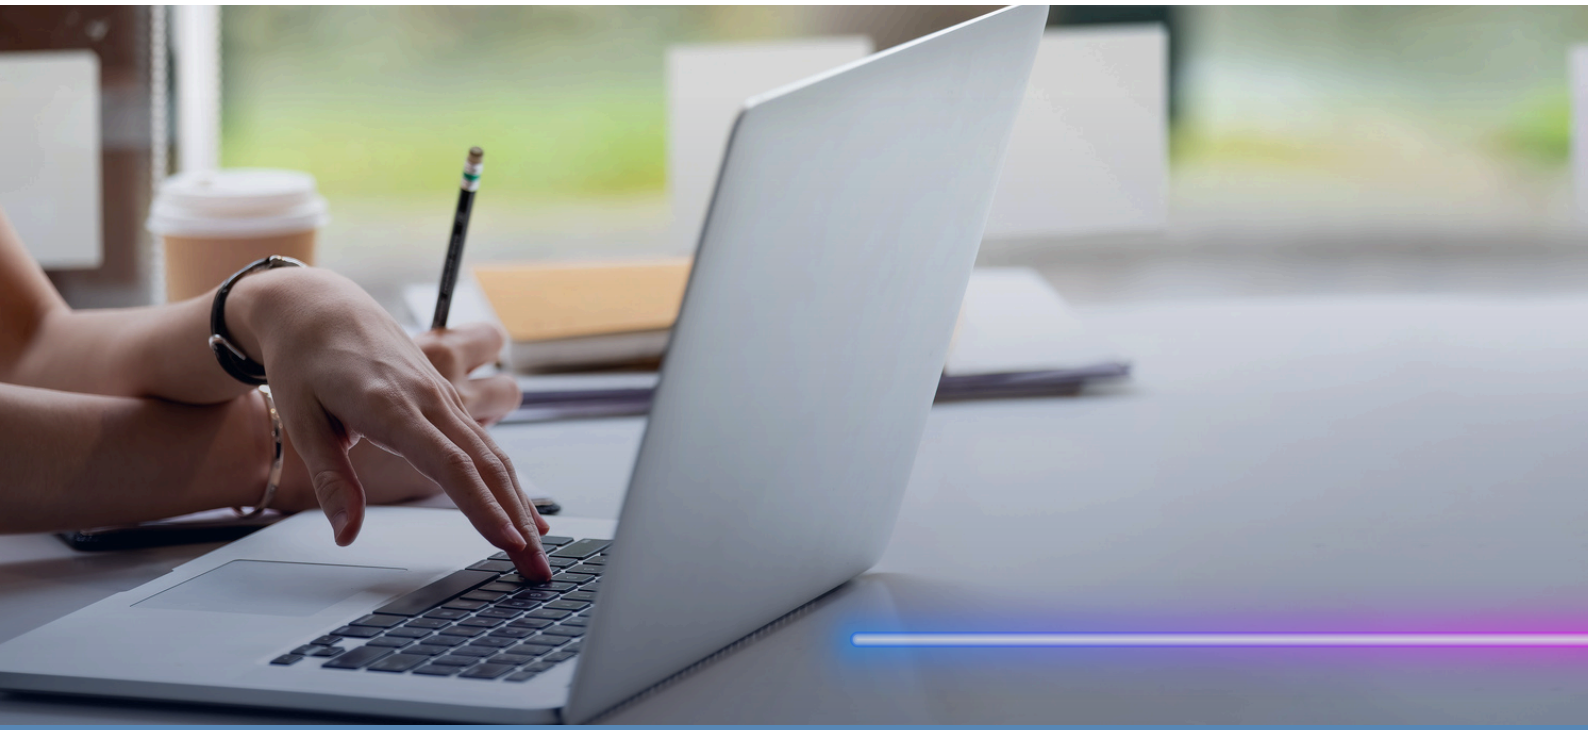

Improve Veterinary Education offer a range of education options to suit all study preferences and levels of clinical experience. From face-to-face workshops to comprehensive online programs, and new graduates to experienced veterinary professionals, our courses allow you to progress your career and ultimately, to deliver better patient care.

We offer ISVPS-accredited education to the veterinary community in a range of clinical disciplines.

What makes our courses different from other providers?

- **Postgraduate qualification**: the only ISVPS-accredited training in Australia & New Zealand, allowing you to work towards globally-recognised qualifications and postnominals.
- **World-class CPD:** Hundreds of global specialists help bring our programs to life, ensuring you get up-to-date, clinically relevant CPD, based on the latest research.
- **Structured practical approach** to each subject area, so you can build on your learning and advance confidence, knowledge and skills.
- **Interactive online learning platform:** Allowing you to study where and when you want, so that you can structure your education around your work and life commitments.

When you choose education from Improve Veterinary Education, you can be confident that you're advancing your career with a world-class CPD provider.

ACCELERATED EMERGENCY PROGRAM

Your go-to guide for gaining confidence in your emergency practice.

The Accelerated Emergency Program is the solution for vets wanting to be confident in their management of after-hours and day-to-day emergency patients. It is your stepping stone for a transition into emergency practice AND gives opportunity for postgraduate qualifications, while you study.

Each of the modules covers topics that are relevant and applicable to the everyday clinical setting, including: diagnostic tools, interpretation of diagnostic findings, recommendations for workup, up to date treatment, case-based assessments and overall critical care patient monitoring and management. It's your 'need to knows' for emergency practice!

★★★★★

Being a recent graduate I sometimes found myself being intimidated when it came to dealing with emergency cases. That all changed when I came across this course

CARDIOLOGY

Deepen your knowledge of cardiology and explore the fundamentals of cardiac disease.

This program has been developed by a team of registered specialists and covers all aspects of cardiology from the basics to more advanced and challenging concepts.

Across the 12 modules, this course covers the fundamentals of underlying cardiac disease, discusses the presentations of cardiac disease and thoroughly reviews current diagnostic and therapeutic techniques.

You will learn the latest information on commonly utilised diagnostic procedures, practical electrocardiogram (ECG) interpretation, film reading and hands-on echocardiography. Dedicated Q&A with specialist cardiologist tutors on the discussion boards so can engage and share your complex cases and review any questions throughout the program.

Delivered 100% online, this program allows vets with a specialist interest in Cardiology to achieve a postgraduate qualification whilst maintaining work-life balance.

DERMATOLOGY

Confidently manage everyday cases to complex dermatological challenges.

Skin disorders are a very common clinical presentation in small animal practice – but that doesn't mean their diagnosis and treatment are always easy.

This global program module course is filled with up-to-date, clinical information in veterinary dermatology. You will have a chance to revisit basic topics, such as the anatomy and physiology of the skin, and to develop your knowledge in common conditions including pruritus, infections and ulceration.

You will also cover more complex and unusual disorders such as immune-mediated skin disease, neoplasia, and alopecic conditions and refine your approach to skin diseases.

By improving your confidence and expanding your knowledge of different cases and presentations, you will be better able to both diagnose and treat your skin patients. Supported by specialist dermatologists in the discussion boards, you will have lots of opportunity for Q&A and case share.

EXOTIC ANIMAL PRACTICE

Expand your knowledge and deep dive into the world of exotics.

Exotic pets are fascinating and unusual, and can be some of the most rewarding patients to work with in general practice. This program will assist you in consolidating your knowledge of exotic medicine and surgery and help you develop an informed clinical approach to exotic patients.

This program has been developed to provide up-to-date knowledge across a range of different zoological and exotic species*. A logical approach, from the initial examination and diagnostic sample collection, to anaesthesia, diagnostic imaging and the workup and treatment of common and more complex diseases, is a core objective of the program.

It also covers the latest techniques and therapeutic options for selected exotic animals, giving you the skill and knowledge to treat these patients with confidence. Lastly, you'll get the opportunity to ask questions and share cases with your supporting specialists and global colleagues on the discussion forum.

*Please read the module learning objectives on our website for full details on the species covered as these predominantly focus on European/Northern hemisphere species, not Australian/tropical species.

SMALL ANIMAL NEUROLOGY

Gain the skills to diagnose and treat complex neurological cases with clarity and precision.

Neurological cases can be challenging, even for experienced veterinary professionals.

By joining this program, you will master the fundamentals of neurology, from neuroanatomy to the neurological exam and then advance to subjects including neurodiagnostics, neurology emergencies and emergent therapies.

Regular case discussions are also included to help you get a real-life meaningful approach to this topic. Each lesson is engaging and interactive and has been built by a team of online learning specialists.

The course content is overseen by a Specialist in Veterinary Neurology and includes a dedicated discussion forum to support your learning, share cases and grow your veterinary network.

NEW PROGRAMS COMING SOON

Small Animal Medicine & Soft Tissue Surgery Programs

ISVPS General Practitioner Accredited Training Programs

These essential programs are being redesigned for the needs of modern veterinary practice; delivering more than just knowledge. You'll build clinical confidence, sharpen your diagnostic reasoning and access some of the most advanced CPD tools in the profession.

What's New?

- Problem Oriented Medicine (POM)
- Active Learning Activities (ALAs)
- On-on-one Expert Mentorship
- Advanced Learning Tools including AI
- One-year Certification Route
- More practical & hands on training

Make sure you're subscribed to our newsletter to get all the latest information about the release of these reimagined programs!

Face-to-Face Workshops: Vets

Fast-track Workshops

We offer a range of hands-on, practical workshops, designed to give you skills, knowledge and confidence, FAST.

Our workshops allow you to grow practical skills that you can immediately apply to your clinical setting. These face-to-face sessions are delivered by Specialist tutors at world-class wet lab facilities and cover both theory and practical training. We keep our group sizes small, meaning you get plenty of time to practice your new skills and techniques.

New workshops and dates are often added throughout the year, so be sure to keep an eye on our website for all the latest availability.

NOTE: 2027 workshops and dates TBC.

EXPLORE ALL

Introduction to Abdominal Ultrasound

This workshop is designed for vets who have with limited experience with, or need a refresher in, diagnostic ultrasound. It's all about getting the basics right and gaining confidence with imaging. Areas covered include the liver, spleen, gastrointestinal, reproductive and urinary tracts. Ultrasonographic measurements needed for assessments and clinical diagnosis are also explored.

Introduction to Echocardiography

This workshop is designed for vets who want to learn the theory and practice of basic cardiac ultrasound. It will cover how to obtain the useful echo measures for decision-making and diagnosis of commonly acquired valvular diseases and useful myocardium measures. You will build skills you can immediately apply to your clinical practice and will be able to assess patients with newly diagnosed murmurs and other common conditions.

Don't take our word for it...

The ECC Membership Prep Program is an excellent choice for anyone preparing for their Membership exam, or looking to build their knowledge and confidence in ECC. There is a huge amount of content to cover for the exam. After not studying for a long period, the structure of the program helped keep me accountable and on top of the material. I would not have passed without it.

Dr. Travis Worthington

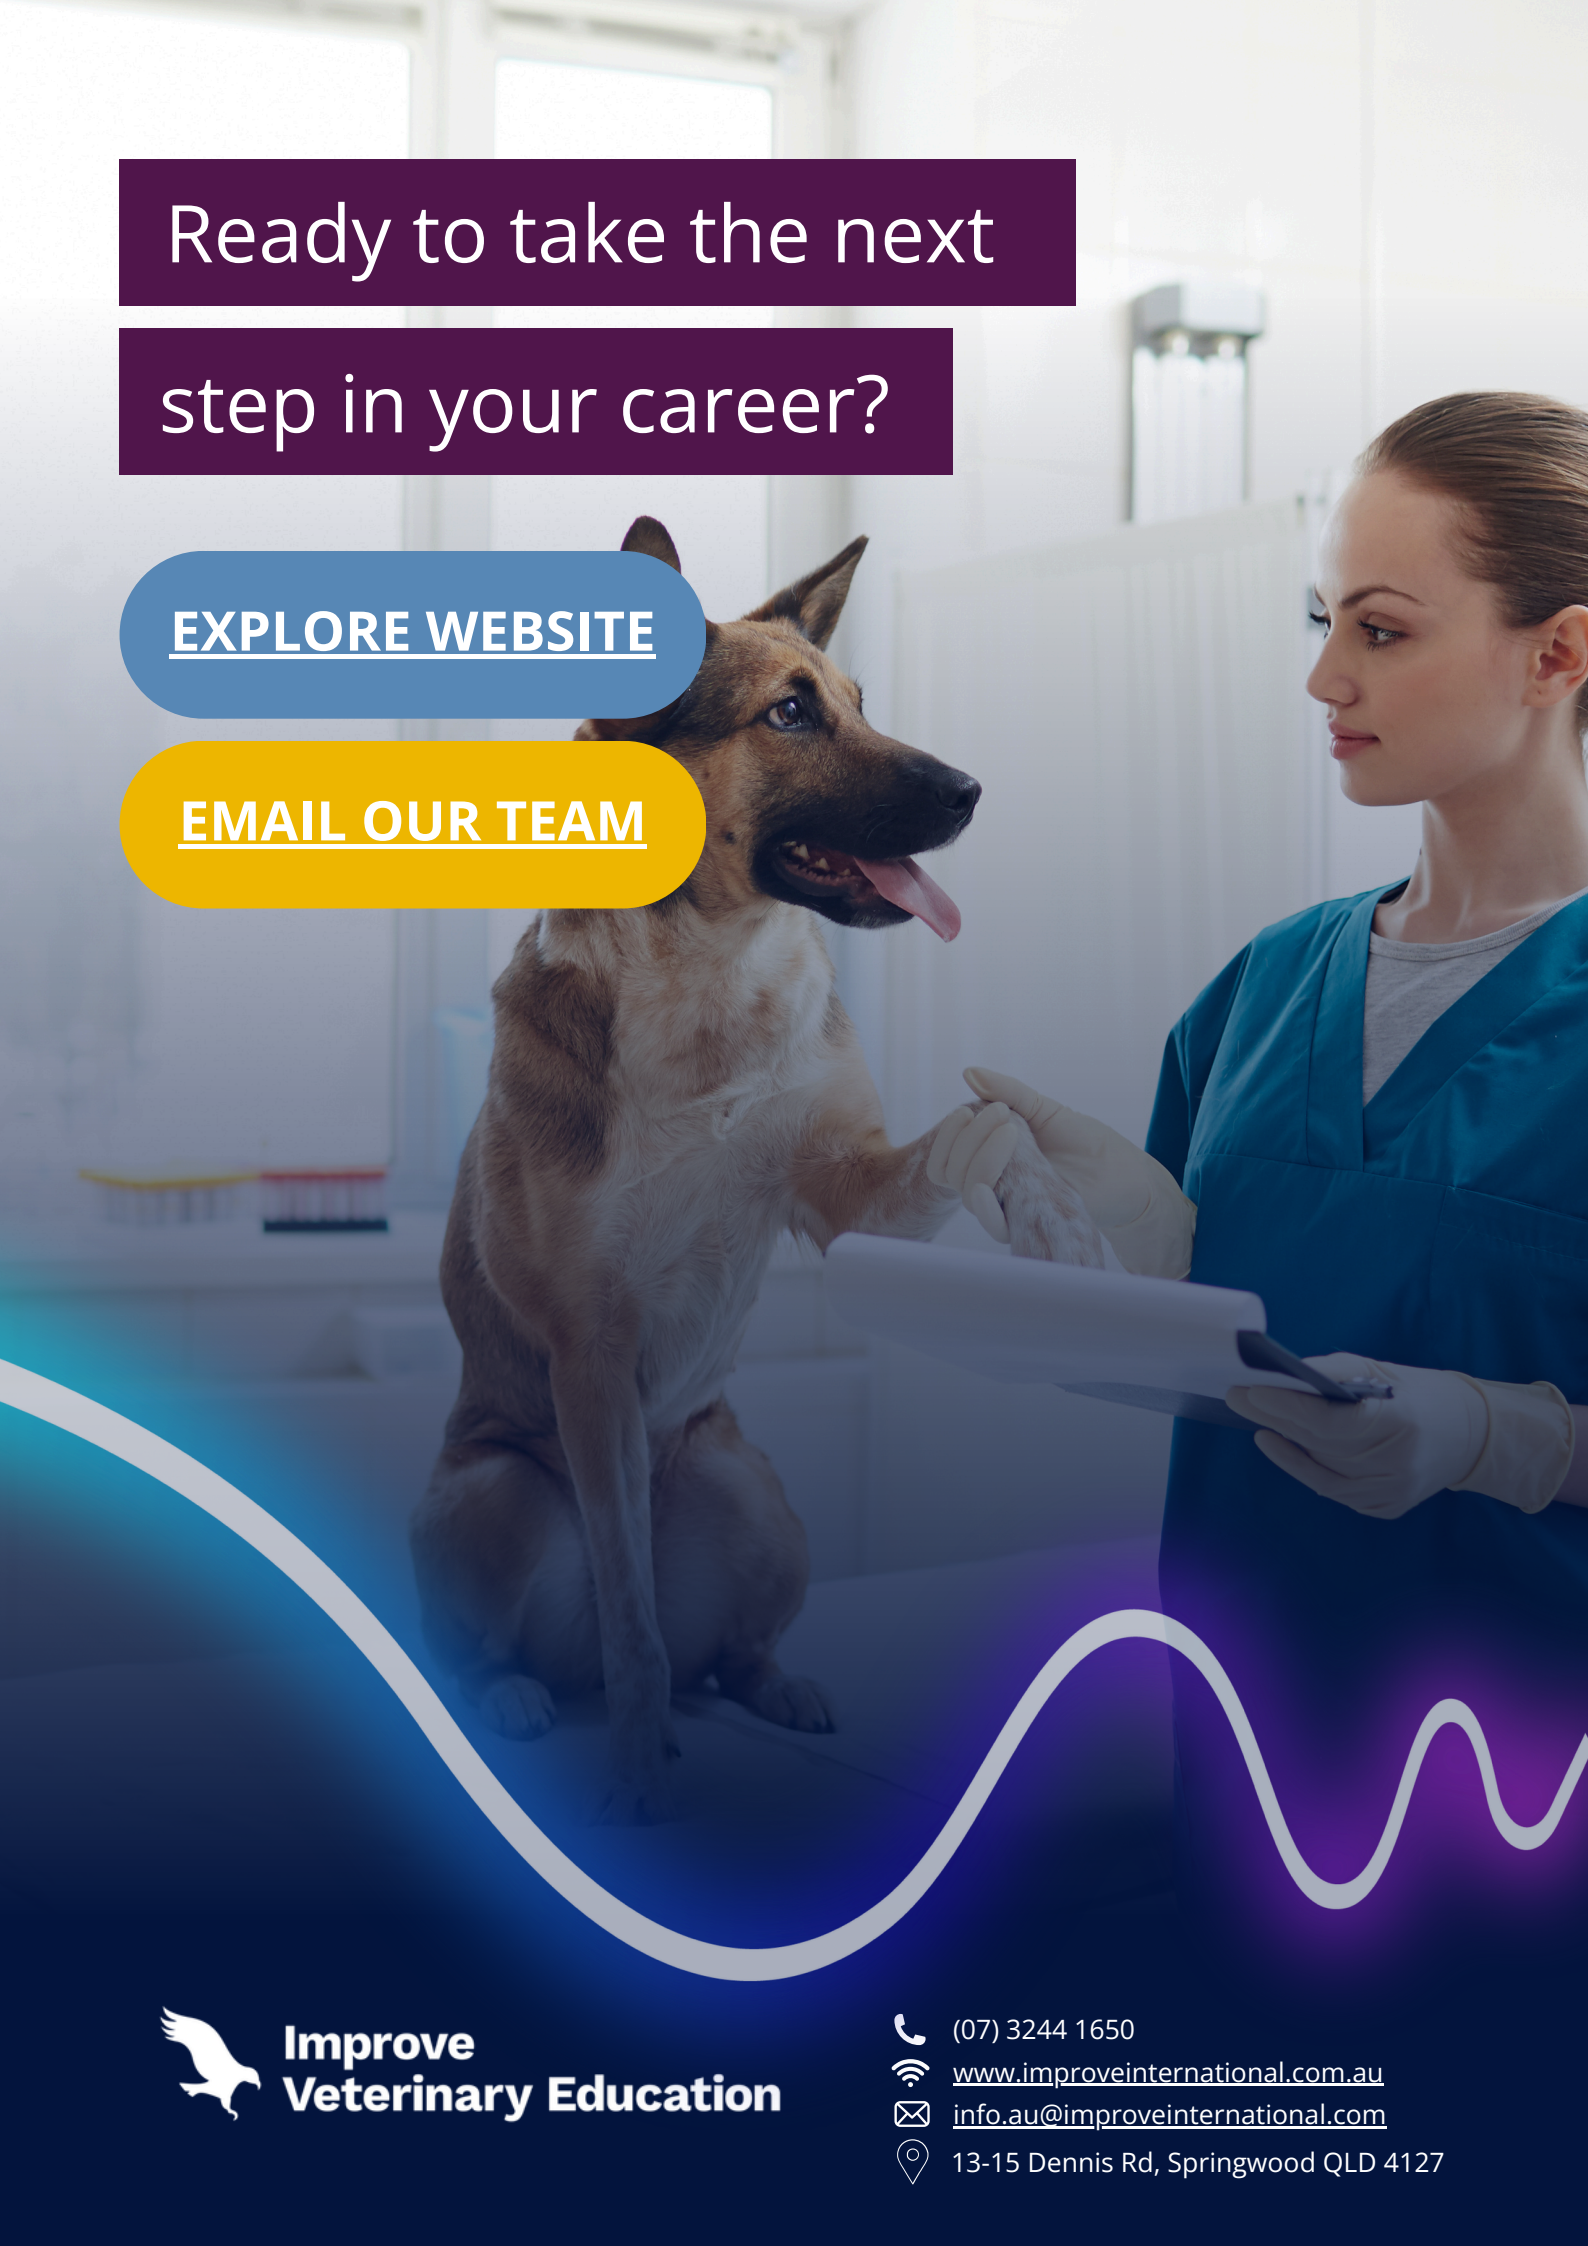

I often found myself intimidated by emergency cases, but that changed when I came across the Accelerated Emergency Program. The fun and easy-to-follow modules thoroughly covered various subjects and provided theory alongside supporting videos. By the end of the program I was confident in managing any kind of emergency that would come through the door.

Dr Elli Michaelidou

The Small Animal Medicine program was excellent... It was invaluable to be able to ask the specialist tutors questions! My confidence has increased as I know that I am recommending gold standard treatments that are up to date. Better patient outcomes now make my shifts more enjoyable. This has benefited not only myself and my patients, but also our whole hospital.

Dr Leonara Vargas
